Skills

Languages	Front-end	Back-end	Tools & Libraries
• HTML	• React	• NodeJS	• NPM
• CSS	• Tailwind CSS	• ExpressJS	• Git
• JAVASCRIPT	• MaterialUI	• MongoDB	• Github
	• Apollo CLient	• Mongoose ODM	• Cloudinary
	• HandlebarsJS	• MySQL	• DayJS
	• EmailJS	• Sequelize ORM	
	• JWT Decode	• Apollo Server	
		• GraphQL	
		• Express Session	
		• JWT	
		• Heroku	

Projects

YARDGEMS, PROJECT LEADER - 2 WEEKS (BOOTCAMP PROJECT - FULL STACK)
A community-driven platform designed to streamline the yard sale experience. The application eliminates the tedious need to drive around in search of yard sales by providing a centralized platform where users can find and list yard sales in their area - https://yardgems-15b0faee737f.herokuapp.com/

- Led server setup using NodeJS and ExpressJS

- Utilized React's context API for efficient global state management

- Integrated GraphQL API, enhancing data querying and mutation processes

- Implemented JWT to ensure secure user authentication

- Facilitated the addition of an image upload feature using Cloudinary to improve user engagement

MEAL MAPPR, DEVELOPER - 2 WEEKS (BOOTCAMP PROJECT - FULL STACK)
A digital meal planning application designed to simplify nutrition tracking. Offers a recipe search and save feature, enabling users to easily plan meals and monitor nutritional intake. - https://mealmappr.herokuapp.com/

- Styled application elements with Tailwind CSS to enhance the user interface

- Integrated dynamic recipe search feature via 3rd party API to enrich user experience

- Developed RESTful API endpoints to extend app functionality

Projects - continued

ESCAPE ME, SOLE DEVELOPER — ONGOING (PERSONAL PROJECT - FULL STACK)
A customizable booking system initially designed for escape room businesses. Features an admin portal for comprehensive management of bookings, users, and escape room details. Scalable for other business types. -
https://escape-me.herokuapp.com/

- Responsible for the end-to-end development

- Set up the server architecture using NodeJS and ExpressJS

- Implemented Express Session middleware to ensure secure authentication and authorization

- Utilized HandlebarsJS for efficient rendering of views

- Established a MySQL database using Sequelize ORM to manage data storage

- Crafted RESTful API endpoints to facilitate CRUD operations

- Styled the application using Tailwind CSS, focusing on a user-friendly interface

Education

UTSA School of Data Science
Coding Boot Camp - Full Stack Web Development (MERN)
Jan 2023 - July 2023

Work Experience

Field Representative / Vanguard Field Strategies / Jul 2023 – Sep 2023 (3 mos)
I served as a Field Representative contributing to the success of key initiatives for a Super PAC. My role encompassed grassroots mobilization, data collection, and strategic outreach. I excelled in engaging with diverse communities, effectively communicating campaign messages, and meeting organizational objectives, all while adhering to the highest ethical standards.

Samsung Certified Advisor / Best Buy / 2016 – Jul 2023 (6 yrs)
As the Samsung Certified Advisor, I was the go-to expert for Samsung products within the Home Theatre category. Over a span of 3 years, I led this project and was responsible for driving sales revenue and educating both customers and employees on the latest Samsung technology. My role was not just sales-focused; I was a brand ambassador who successfully built a personal brand around trust and expertise, consistently delivering results year over year.

Freelance Photographer / Omar Zumaya Photography / 2019 – 2022 (3 yrs)
As a freelance photographer, I specialized in concert/live music, studio, and portrait photography. My work is characterized by a unique blend of creativity and technical skill. I've successfully managed all aspects of my photography business, from client acquisition to post-production, leveraging my proficiency in Adobe Photoshop and Lightroom.

Licenses & Certifications

Coding Boot Camp Certification - UTSA School of Data Science
July 2023
